

## DIRECTIONS FOR USE

### SCALP PREPARATION:

Wash hair with Volluma Shampoo which is specially formulated to remove residues and prepare the hair for Volluma Hair Thickening Spray. Ensure shampoo is thoroughly rinsed from hair and that hair is completely dry. Style hair as desired.

### PRODUCT APPLICATION:

Shake Volluma Hair Thickening Spray vigorously for 30 seconds before use and then periodically between bursts. Start application approximately 1-2 cm behind hairline in order to achieve a natural look. For best results, apply Volluma in short bursts to allow quick drying, gently styling between bursts to keep hairstyle looking smooth and natural.

For short hairstyles, spray in short bursts onto thinning areas holding can 20 cm from hair while gently styling with a coarse comb or brush. If no other styling products are used, apply a gloss hair-spray to add shine and durability.

For longer hairstyles, lift thinning hair with a coarse brush or comb and spray in short bursts into hairstyle. Avoid spraying surface hairs to leave them with their natural color and shine. Repeat application until desired hair fullness is achieved.

### STYLING:

Once treated hair is completely dry and the desired hair density is achieved, styling products such as gels and waxes may be used. Hair sprays or finishing gloss can be used to add hold and shine.

### TIPS:

- Remove excess wet product from hair by lightly dabbing these areas using a facial tissue in soft circular motions. Continue until dry.
- Use a cotton swab to provide the finishing touches to achieve the most natural-looking hairline.
- Remove any over-spray residue from skin with liquid soap or an alcohol pad.
- Be sure to protect clothing from over-spray.

I'm 23 years old and I LOVE Volluma! I must say, I was sceptical at first, but I was willing to try anything to cover my "thin spots". The first time I tried it, I really couldn't believe that it worked - a few sprays and "poof" - insta hair! I can't tell you how much it has boosted my confidence! Volluma works!!"

*Lindsey P. – Toronto, Ontario*

### IMPORTANT NOTE:

Do not use if you have a known allergy to hair sprays, sensitive skin or have open sores on your scalp.  
Avoid spraying Volluma into eyes.  
Volluma uses only humane testing procedures.

### WHAT IS VOLLUMA?

VOLLUMA is a water resistant colored hair thickener for men and women dealing with notable hair loss.

### THE TECHNOLOGY

VOLLUMA Hair Thickener is a specially designed compound of tiny, microfibre “hairs” made of the same organic Keratin protein as your own hair. The result of several years of scientific research, this unique process attaches the protein fibres to existing hair which are restructured to blend undetectably with your own hair, maximizing its appearance. You will instantly see a fuller, more natural looking head of hair than you could ever imagine.

VOLLUMA Hair Thickener is completely safe and is an ideal companion with other hair restoration treatments maximizing your hair to look naturally thicker and stronger. The spray is virtually undetectable even from close up and unlike other products VOLLUMA is water resistant. VOLLUMA has been extensively tested in hair restoration clinics throughout Europe achieving astonishing results on transplant patients. Volluma Hair Thickener is also a non medical option for people who are not yet ready for, or able to have a hair transplant.

### HOW IS VOLLUMA DIFFERENT FROM OTHER PRODUCTS?

Unlike other cosmetic enhancers, VOLLUMA is wind and water resistant making it effective, regardless of your activity. VOLLUMA is available in nine natural hair colors, which can be used alone or in combination to closely match your hair.

*“This product is especially useful for women who, for various reasons cannot be assisted by means of a hair transplant. These patients do not require artificial hair replacement and experience thick hair with the application of Volluma... Volluma is also recommended for men who have undergone a successful hair transplant but want even thicker hair.”*

**Dr. Frank G. Neidel,**  
President of the European Hair Restoration Society.

### HOW LONG DOES VOLLUMA REMAIN ON MY HAIR?

The adhesive properties of the microfibers can keep hair in place for several days. VOLLUMA can be removed with multiple applications of any shampoo or, washing with our specially formulated VOLLUMA Shampoo will remove VOLLUMA Hair Thickener residue with only one application.

### WHAT IF MY HAIR GETS WET WHILE WEARING VOLLUMA?

The water resistant properties of the VOLLUMA formulation also make it resistant to perspiration and rain which allows you to actively participate in all your favourite sports with full confidence.

### DOES VOLLUMA LEAVE STAINS?

Properly applied, VOLLUMA Hair Thickener clings firmly to hair and is rub resistant. Be sure to protect clothing while applying. Overspray on skin can be easily removed with soap and water.

### HOW LONG WILL A CAN OF VOLLUMA LAST?

A 300 ml can contains enough product for 20-25 typical applications depending on the area to be treated and frequency of use. A single can may last up to 3 months.

### CAN VOLLUMA DAMAGE MY HAIR?

VOLLUMA Hair Thickener safely adds density to any type of thin hair including hair restored through medication or transplantation.

### DOES VOLLUMA WORK ON SHORT HAIR?

VOLLUMA Hair Thickener is ideal for use on all hair lengths but there must be some hair on the scalp for the microfibers to attach to.

### CAN I USE VOLLUMA IN COMBINATION WITH OTHER HAIR PRODUCTS?

Yes, in fact using a gloss hairspray adds natural shine to the hair. Once VOLLUMA Hair Thickener is applied and has sufficiently dried you can style your hair using any styling products such as gels and waxes.

### CAN I USE VOLLUMA AFTER A HAIR TRANSPLANT?

VOLLUMA Hair Thickener is a great compliment to hair replacement surgery helping improve the visible results. It is important that the scalp is completely healed and that there is hair on the thinning area for VOLLUMA to be effective.

### WHICH COLOR OF VOLLUMA SHOULD I USE?

Simply select the VOLLUMA color that most closely matches your hair color. If in doubt, choose a shade darker than your hair color. A color combination is often necessary to achieve a more appropriate match, apply the darker color first and then add the lighter color to match existing hair color.

“I’ve been in the hair business for 40 years. When training new staff, I will mention to them that we are in the “Feel Good” business. We want our clients to “Feel Good” about themselves when they leave our shop. Many products promise thicker, volumized hair, but leave you thin and flat. Volluma actually works.”

Paul Jarvis, Hair Crafters, Hamilton, Ontario, Canada

Volluma works on any length hair for both men and women.
