www.volluma.net  
Canada & USA

### VOLLUMA COSMETICALLY RESTORES YOUR HAIR WITH NO DRUGS, SURGERY OR HAIRPIECE

- 10 Natural Hair Colours • Quality German Product • Patented Formula • Revolutionary • Water Resistant •

#### CONGRATULATIONS!

With **Volluma** you have chosen a unique and innovative product that when used correctly will give you back the appearance of a full head of hair and renewed self confidence.

**Look Good, Feel Great!**

#### IMPORTANT:

**Shake Volluma vigorously for about 20 seconds before every use and periodically (5-10 seconds) during use**

#### INSTRUCTIONS

(Please watch our instructional videos at [www.volluma.net](http://www.volluma.net))

##### Step 1:

- Wash your hair with Volluma Anti-Residue Shampoo to completely remove previously applied Volluma or other product residues.
- Thoroughly rinse shampoo from hair.

##### Step 2:

- Completely dry and style hair with curling or flat irons before using Volluma.
- Use no styling products yet.

##### Step 3:

We recommend protecting your clothes with a cape during application, just as your professional Hairdresser would. As with all hairsprays, Volluma should be applied in a well-ventilated area such as a bathroom or possibly a balcony or terrace

##### Step 4:

#### Product Application:

- Shake Volluma vigorously for 20 seconds before every use and periodically (5-10 sec.) during use
- Gently lift hair with a coarse brush and spray into the roots in short bursts starting about 20 cm from your head.
- Use a sweeping motion for a smooth application and to avoid creating wet areas
- For a natural looking hairline, start the application approximately 1-2 cm behind your hairline
- Repeat application until desired thickness is achieved

##### Step 5:

Allow hair to dry completely for 2 to 3 minutes, then gently re-style your hair.

- Use no hot irons after applying Volluma
- Finish with a good quality hair spray or shine spray to add shine and set the application
- Apply other styling products such as waxes or gels after hair is dry.

#### APPLICATION TIPS:

- Remove overspray from skin with a cotton pad and alcohol, soap or a face cleaning lotion.
- Use a cotton swab to provide the finishing touches to achieve the most natural looking hairline.
- Remove wet excess product from hair by lightly swirling a crumpled facial tissue on the area then wait until dry before proceeding.

#### RECOMMENDATIONS:

- As with any cosmetic product Volluma may transfer slightly on a pillow case. If you sleep wearing Volluma, consider a dark coloured pillow case.
- As Volluma is water-resistant, our Anti-Residue Shampoo is recommended to ensure complete removal of previous applications. After removing Volluma microfibers with Volluma Anti-Residue-Shampoo, you can use any conventional Shampoo to wash your hair.

#### IMPORTANT NOTES:

- Do not use if you have allergies to hairsprays, sensitive skin, open sores or a skin disorder
- Use in a well ventilated area, avoid inhaling
- Avoid spraying into eyes.
- Avoid using after chemical hair treatments until after first wash
- Do not use hot irons after applying Volluma
- Volluma is dermatologically tested (Epicutan-test).
- Volluma is not tested on animals.
